

Yousaf Umer

Data Engineer & Data Analyst

Karachi, Pakistan | yousafumer128@gmail.com | 0341-2876236 | github.com/yousafumer | linkedin.com/in/yousaf-umer-558102214

ABOUT

Computer Science graduate with 6 months of professional experience as a Data Analyst and hands-on expertise in SQL, Python, Power BI, Excel, and Web Scraping. Experienced in cleaning, transforming, and analyzing structured and unstructured data, building interactive dashboards, developing ETL workflows, and generating actionable business insights. Growing focus on Data Engineering, workflow orchestration, and cloud data warehousing.

SKILLS

Programming: Python, Pandas, NumPy, Regex

Databases & SQL: SQL, SQL Server, MySQL, Snowflake (basic)

Data Engineering: ETL Workflows, Apache Airflow (basic), Docker (basic), Data Warehousing

Visualization: Power BI (DAX, KPIs, Dashboards), Excel (Pivot Tables, VLOOKUP, XLOOKUP, Power Query)

Automation: Selenium, BeautifulSoup, Requests, Pagination Handling

Tools: Git, GitHub, Jupyter Notebook, VS Code

WORK EXPERIENCE

Data Analyst — Darul Sehat Hospital, Karachi

Jan 2026 – Jun 2026

- Cleaned and transformed hospital operational datasets for reporting and analysis.
- Developed KPI dashboards using Excel and Power BI.
- Prepared reports to support quality and operational decision-making.
- Validated data accuracy and maintained reporting consistency.

Automation Assistant — Selenium IDE Project (Remote)

2025

- Helped with a small client project using Selenium IDE for basic web automation.
- Recorded actions and created simple scraping flows under guidance.

EDUCATION

BS Computer Science — Benazir Bhutto Shaheed University Lyari

2022 – 2026

Relevant coursework: Data Mining, SQL, Machine Learning, Python Programming, Databases, Power BI.

PROJECTS

SQL Data Warehouse (SQL Server) — Multi-layer Bronze/Silver/Gold warehouse with ETL pipelines and dimensional modeling.

Apache Airflow ETL Pipeline — Automated extraction, transformation, and loading of S&P 500 data using Airflow DAGs and Docker.

Smart City Air Quality Monitoring — Snowflake + Python + Power BI pipeline blending simulated IoT and OpenAQ API data.

Power BI — Sales Analysis Dashboard — Multi-page dashboard covering sales performance, budget vs. actual, and DAX-driven insights.

Power BI — Call Center Performance Analysis — MySQL-integrated dashboard analyzing 5,000+ call records and agent KPIs.

Excel — Bike Sales Dashboard — Pivot table and slicer-driven dashboard identifying sales trends and customer segments.

Urdu News Scraper (Python) — BeautifulSoup/Requests scraper for ARY & BBC Urdu with pagination handling and JSON export.

CERTIFICATIONS

Big Data Analytics Techniques — IBA Karachi (2025): Hadoop, PySpark, SQL, distributed systems.

Python for Everybody — University of Michigan, Coursera (2024).
